COMMENTARY

The Department of State Planning under its basic legislative authority, acts as the Governor's principle staff agency in planning matters concerning the resources and development of the State. Included in its mandated responsibilities are: (1) prepare the State's capital program and the annual capital budget, as well as study all capital projects prepared to be undertaken by State departments and agencies, and (2) prepare amend and keep up to date a five-year program of State public works and major capital improvement projects undertaken or recommended to be undertaken by the State. Both of these responsibilities are performed each year and documented for presentation to the General Assembly at the beginning of each session.

In addition, the Department of State Planning prepares annually a historical summary of all state-owned and non-state-owned improvement projects authorized by the General Assembly and funded under the General Obligation Bond Authority together with those projects funded under Capital Appropriations in "The Maryland State Budget" that is annually prepared for each fiscal year. The historical summary does not include those capital projects of the Department of Transportation that are supported by the Consolidated Transportation Bond Program or those supported by other Revenue Bond authority.

Prior to July 1978, the annual Capital Improvement Program, The Five-Year Capital Needs Program and the Historical Summary have been published and distributed as a single document just prior to the beginning of each session of the General Assembly in January. In order to provide updated information for distribution of previously authorized and funded capital improvement projects in a more timely manner, beginning in 1978, the Historical Summary was published and distributed as soon as possible after the beginning of each new Fiscal Year. As a matter of convenience and for ease of cross reference, the recipient State Agencies will be listed in the Historical Summary in the same order of sequence that they appear in "The Maryland State Budget" (Annual Operating Budget). Whereas the Annual Capital Improvement Program and the Five-Year Capital Needs Program, including the legal requirements and directives, will continue to be published as a separate document and distributed just prior to the General Assembly session.

This report presents a Historical Summary of the Capital Improvements authorized by the General Assembly 1966-1980 and funded under General Obligation Bond Authority or as a Capital Appropriation in the annual State Operating Budget.

If information is desired on capital improvements projects authorized prior to 1965, reference should be made to Department of State Planning Publication No. 129 entitled "Capital Improvements Authorized by General Assembly 1947 through 1964", dated September 1964. For capital improvements projects authorized from 1965 to 1979 see Department of State Planning Publication No. 374 entitled "Historical Summary of Capital Improvements Authorized by General Assembly 1965 through 1979", dated July 1979.

The General Assembly's deletion of funds for the Veteran's Cemetery Program reflects the belief that the Federal Fund appropriation of \$619,012 in Supplemental Budget #1 should be sufficient to continue the cemetery projects now in progress during fiscal year 1981. It is the intent of the General Assembly that the Maryland's Veteran's Commission should give priority to complete the sites, including planting, and that proposals for chapels, administration and maintenance facilities should be deferred until additional funding is made available in subsequent fiscal years. ²
